To: Special Agent Adam S. Lee

1st Email conversation exchanged between Dan Johnson and The Rutherford Institute. The email exchange was sent in a PDF Printout to my family while I was in the county jail pending Federal trial for the child porn charge I was set up on. It may have some good information which you can use to prove my innocence and exonerate me, you know prove that I am not-guilty of the indictment.

Nisha, John:

This is Dan Johnson from PANDA. I was referred to you by Pete Santilli.

A young man named Brian Hill contacted you a few months ago about helping in his case. He had been raided on suspicion of child pornography, and had reached out for help. He has Aspergers and is a High-Functioning Autistic, so he was not able to accurately convey his case to you. He did not receive a reply.

He was arrested on Friday by the Department of Homeland Security, and will be arraigned tomorrow in Greenseboro, NC.

I have been contacted by his grandparents for help, and agreed to do so, especially since there was no trouble until Brian was involved in some activism against indefinite detention under the NDAA. This is a very unique, and disgusting, case.

A few key points:

This case started with political activity:

Brian used to run an alternative media site. He did FOIA's to find out who DHS was watching, reported on national news, made documentaries, etc.

He found out about the NDAA, then gathered signatures for a petition to present to his town council. The council rejected his petition.

Shortly afterward, he approached the town Attorney, State Senator Phil Berger, on video and confronted him about the incident. Berger had the Police Chief escort him out. according to Brian, the Police Chief threatened him in the hallway afterward.

Timing of the IP Monitoring:

Brian's IP was requested less than two weeks after confronting Sen. Berger for three files which "may or may not be underage people engaged in sexual acts, were possibly downloaded." This is suspicious timing.

IP's can also be spoofed, changed, Virtual Private Networks can be used, etc. Yet the IP is the crux of the search warrant. Brian also noted that he used the default router password, which could easily be cracked.

Interrogations were conducted without an advocate present, other odd things:

Brian was interrogated twice. Both times he was not read Miranda, and even though the police were told he had autism multiple times by his mother, he was not offered an advocate, nor did he get one.

The police shouted at Brian to "Fess up!" and threatened to get his mother in trouble if he did not.

The police repeatedly asked Brian and his mother if they were associated with "Sovereign Citizens," which has nothing to do with Child Porn and is inherently political.

He is being charged with possession of ONE underage pornographic image:

The Federal charges he is under are for one image. Logically, if one is a pedophile, one would have more than one image on their computer. Also, at the attached report notes, someone with Autism/Aspergers will download tons of images, not knowing the social consequences, yet they only found one.

To my knowledge, federal prosecutors do not involve themselves with cases of one picture. The standard guideline is 20 or more pictures.

The Mayodan, NC police were in the house 30 minutes, and had enough time in the house to plant an image.

A State Bureau of Investigation official involved in his case has been in trouble before.

According to an article I've attached, SBI Agent Gerald Thomas, and SBI agent involved in his case, has been in trouble for tampering with evidence before. The PDF is "Agent Violated its Practices." SBI Agent Deaver, his boss, has been in trouble multiple times for perjury, tampering with evidence, and falsifying evidence.

Senator Berger has family connections:

The Rockingham County (where Mayodan is located) NC D.A. is the senator's son. The sister of Robert Bridge, one of two officers on the search warrant, is also the assistant D.A.

Mayodan Police repeatedly lied to Brian and his family

The Mayodan Police lied at least twice. Once, the day after the raid, they told Brian and his family they could come sign for his stuff. Instead the police took this opportunity to interrogate him and his mother. Secondly, this month, they again lied that Brian could now come get his stuff, and scheduled a time for him to come get it. Detective Todd Brim then lied to the family that there was no warrant, and that he would not be arrested. The police instead intended to arrest Brian, as they knew there was a Federal warrant out for his arrest.

Issues with the Search Warrant:

An investigative journalist out of California looked over the warrant, and found some issues, I have attached her notes to this email.

Threatening emails:

Brian received several emails from anonymous (tormail) accounts threatening him to stop what he was doing and in emails to myself and five other activists he was derided, insulted, and called a pedophile.

This is starting to become a national trend:

This appears to be a new technique to take out activists. We know of at least 5 people, including myself, who have had an attempted set up. This case is groundbreaking, because this is the first time a setup has worked, and someone was actually charged, but were this blown out of the water it could gain national media attention and keep any other activist from being falsely charged this way.

In a way "child pornographer" is the new "terrorist" label affixed to someone to crucify them in public opinion before they are proven innocent. It is a title in which one is guilty until proven innocent, and in the court of public opinion, guilty even after proven innocent.

I am willing to risk my reputation as an activist on this case because not only is Brian a friend of mine, but he has been the victim of a set up in the worst possible way. I look forward to our discussion tomorrow.

In Liberty,

Dan Johnson

Matt:

Below is the email I sent to Rutherford. It has all the information about the case. The key points for this status are:

Brian is an Anti-NDAA activist, and a public official has a personal vendetta against him. He has Aspergers and Brittle Diabetes. He is currently in jail in North Carolina. His mother is being denied a visit. The police are refusing to give him his insulin or medicine. He could die in jail without it. He needs to at least have the right to a fair trial, and if he's dead he won't get that.

I have attached his picture if it helps.

People need to call the Sheriffs office at (336) 641-3694 and ask to be transferred to the jail. Then demand Brian D. Hill gets his insulin and medicine. I can't stress enough that he has a good chance of dying without it. Brittle diabetes isn't regular diabetes.

Secondly. The family is having a really hard time. Really hard. A friend of theirs set up a support group here: <https://www.facebook.com/groups/569239413159262/> and if compassionate people would go on there and give the family encouragement that would really help.

Thank you for all of this Matt,
